Professional Experience

ACES Pty Ltd
Full Stack Developer

present | Sydney, Australia

- Designed, developed, and maintained web applications using JavaScript, React, and Node.js, ensuring optimal performance and user experience.
- Thorough understanding of UX (user experience) concepts to ensure the development of user-friendly and intuitive interfaces.
- Integrated semantic UI components to enhance the consistency and aesthetics of the user interface, resulting in a seamless and cohesive user experience.
- Designed, developed, and deployed a robust backend infrastructure on AWS. Utilized Node.js and Express.js to create RESTful APIs for seamless communication between the front-end and back-end systems.
- Streamlined development with AWS Amplify, Lambda for serverless tasks, S3 for scalable storage, DynamoDB for NoSQL data, and Athena for query analysis.
- Familiarity with Storybook showcases an understanding of UI component development and its role in enhancing collaboration and design consistency.
- Implemented automated testing strategies using Storybook for comprehensive component testing and Cypress for end-to-end testing. Established and configured a CI/CD pipeline on AWS, automating testing and deployment processes to ensure code quality and facilitate rapid feature delivery.
- I worked closely with the development team to follow agile development processes, including sprint planning and daily stand-ups, promoting efficient teamwork and project delivery. Displayed a passion for web development, producing code that was not only functional but also elegant and maintainable.

Sarjen System Pvt Ltd,
Full Stack Developer

2011 – 2012 | Ahmedabad, India

- Collaborated with a team of developers to design, develop, and deploy web applications using ASP.NET and C#.
- Implemented front-end and back-end functionalities, ensuring seamless user experiences and optimal performance.
- Developed and maintained database structures using Microsoft SQL Server, enhancing data integrity and retrieval efficiency.
- Participated in requirement analysis and design discussions, contributing to the creation of functional specifications.
- Implemented responsive design principles to ensure cross-device compatibility and optimal user experiences.
- Assisted in optimizing application performance by identifying and addressing bottlenecks in code and database queries.
